

For Transmissions...

Transmission Flush & Fill

\$99⁹⁵* (Reg. 129.95)

Evacuate old transmission fluid, including torque convertor, and refill w/OEM Synthetic fluid

9 out of 10 transmission failures are due to overheating and contaminated fluid.

Like regular motor oil, Automatic Transmission Fluid suffers from heat & friction, and breaks down over time. Flushing once a year or every 15,000 miles is the simplest, cheapest way to prevent a costly transmission repair.
